Professional Summary

I'm Micheal Adavize Ibrahim (Mr Mike), a passionate full-stack developer with over 5 years of experience building intuitive, scalable, and high-performance applications for both web and mobile. I specialize in modern frameworks like React, Next.js, React Native, and backend tools including Node.js, Express, MongoDB, and MySQL.

I've built and deployed a range of user-focused solutions - from real-time chat applications to ecommerce platforms and dynamic weather apps. Whether freelancing or working full-time, I bring deep technical knowledge, attention to user experience, and a strong problem-solving mindset. My biggest achievement is my journey from a curious beginner to a trusted expert who understands how to turn user needs into clean, working code.

Let's bring your app idea to life - fast, responsive, and user-loved

Core Skills & Technologies

Frontend: React, Next.js, HTML, CSS, JavaScript, React Native

Backend: Node.js, Express.js, REST APIs

Databases: MongoDB, MySQL

Authentication: JWT, OAuth

Other Tools: Git, Postman, VS Code, Figma, Firebase, Tailwind CSS

Selected Projects

Ecommerce Site:

Built a responsive ecommerce web app with shopping cart, user auth (JWT), and payment gateway integration.

Stack: React, Node.js, Express, MongoDB, JWT

Real-Time Chat Application:
Developed a real-time messaging app with socket communication and secure user

sessions. Stack: React, Node.js, Socket.IO, MongoDB
