TECHNICAL SKILLS

Frontend

- React.js
- Angular
- TypeScript
- Next.js
- JavaScript ES6+
- HTML5 · CSS3
- Tailwind CSS

State & Data

- Redux Toolkit
- NgRx
- React Query
- Context API

Backend

- C# · ASP.NET Core
- Node.js · Express.js
- REST APIs · GraphQL · gRPC

Mobile

- React Native
- Flutter · Dart

Databases

- PostgreSQL
- SQL Server
- MongoDB
- Firebase

Cloud & DevOps

- Microsoft Azure
- Docker · Kubernetes
- GitHub Actions · CI/CD
- Vercel · Render

Architecture

- Microservices
- Clean Architecture
- CQRS · DDD · Event-Driven

Project Mgmt

- Agile / Scrum
- Sprint Planning
- Roadmapping
- Stakeholder Management
- Technical Leadership

Tools

- Git · GitHub
- Figma · Postman
- VS Code
- Jira · Confluence

CERTIFICATIONS

- Scientific Computing with Python — fCC
- JS Algorithms & Data Structures — fCC
- Responsive Web Design — fCC

PROFESSIONAL SUMMARY

Accomplished Chief Technology Officer and Senior Full-Stack Engineer with 8+ years of end-to-end product ownership across fintech, enterprise SaaS, and consumer platforms. Currently serving as CTO at LinksNigeria, leading all technology strategy, architecture, and engineering operations. Expert in React, Angular, TypeScript, C#/.NET, and Azure — with deep experience in microservices, event-driven systems, payment API architecture, and high-performance frontend delivery. Proven project management track record: driving roadmaps, managing cross-functional teams, and translating complex requirements into reliable, maintainable systems on time and at scale.

PROFESSIONAL EXPERIENCE

LinksNigeria

Chief Technology Officer (CTO) · Remote, Nigeria

- Define and own the company technology roadmap, architectural standards, and platform strategy — aligning engineering priorities with commercial objectives.
- Lead, recruit, and mentor a cross-functional engineering team; establish sprint ceremonies, code review standards, and a culture of technical excellence.
- Architected the core platform using Clean Architecture, ASP.NET Core microservices, Next.js frontend, and Azure cloud — ensuring scalability and long-term maintainability.
- Implemented DevOps culture with automated CI/CD on GitHub Actions and containerised Docker deployments — reducing deployment time by 60% and production defect rate by 55%.
- Drove project management processes including roadmapping, stakeholder reporting, and cross-team delivery coordination — translating technical execution into clear business narratives.
- Reduced infrastructure costs by 35% through right-sizing Azure resources, Redis caching, and database query plan optimisation.

Africa International Housing Show

Senior Software Engineer — Platform Architect · Remote, Nigeria

- Sole architect — owned all decisions across database schema, API design, Angular + React frontend, and Azure cloud deployment.
- Designed a modular React + TypeScript + Angular frontend architecture reducing new feature delivery time by 40% through parallel component development.
- Led migration from monolithic codebase to service-oriented architecture, improving reliability and enabling independent module deployment.
- Managed full project lifecycle — requirements gathering, sprint planning, stakeholder reviews, and on-time delivery — reducing feedback-to-delivery cycle by 35%.
- Established CI/CD pipelines, code review standards, and automated testing — reducing production defect rate by 60% within 6 months.

VenPay (Fintech Platform)

Senior Full-Stack Engineer — Backend Lead · Remote, Nigeria

- Architected a production fintech platform across 3 integrated gateways (Busha, SureBank, Bridge) — handling transaction routing, reconciliation, and real-time webhook delivery.
- Designed webhook infrastructure using the outbox pattern with HMAC-signed payloads and exponential-backoff retry — achieving 99.7%+ delivery reliability.
- Built secure REST APIs in C#/.NET with JWT/OAuth2, RS256 token signing, and row-level PostgreSQL policies for multi-tenant data isolation.
- Reduced average query time by 40% through partial indexing, connection pooling, and EXPLAIN ANALYZE audits on high-volume transaction tables.

Vega IT

Mid-Level Software Engineer — Frontend Systems · Remote, Nigeria

- Owned frontend architecture for 3 client-facing products; built a shared React + Angular + TypeScript component library adopted across 4 teams — reducing duplicate code by 45%.
- Reduced frontend load times by 30% through Lighthouse audits, code-splitting, lazy loading, and Webpack bundle optimisation.
- Led Agile ceremonies and project tracking; mentored 3 junior engineers to independent feature delivery within 6 months.

Independent Software Consultant

Full-Stack Consultant · Remote, Nigeria

- Delivered 10+ end-to-end web products for SMB and startup clients — 100% on-time delivery across all engagements.
- Managed client relationships, project scoping, timelines, and post-delivery support — maintaining a 5-star client satisfaction record.

SIGNATURE PROJECTS

Multi-Gateway Fintech Payment Platform · VenPay

- Processed fiat and cryptocurrency payments across 3 gateways with 99.7%+ webhook delivery reliability using outbox pattern and exponential-backoff retry.
- Reduced average query time by 40%; secured all endpoints with JWT/OAuth2, RS256 signing, and row-level
